Career Objective

Aspiring Frontend Developer with a strong background in analytical problem-solving and software engineering principles. Proficient in building responsive, user-friendly web applications using modern frameworks like React.js and Next.js. Passionate about writing clean, efficient code and eager to contribute to a dynamic IT team while continuously expanding technical expertise in full-stack development.

Education

University of Asia Pacific

Apr 2020 – September 2024

BSc in Computer Science and Engineering

CGPA: 3.59/4.00

Relevant Courses: Web Development, Software Development, Data Structures, Algorithms, Database Systems, Artificial Intelligence

Technical Skills

- **Programming Languages:** JavaScript, Python, R, C, C++
- **Web Technologies:** HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), jQuery, React, TypeScript, Express JS, Node.js, Next.js (Basic)
- **Tools:** MySQL, PostgreSQL, MongoDB, Figma, Pixso, GitHub, Netify, Vercel, Docker, Firebase
- **API & Data Handling:** Firebase Authentication, RESTful APIs Integration, JSON, Fetch API, Context API, Axios
- **Concepts:** DSA, OOP, Web Development, Machine Learning, Deep Learning

Professional Experience

Eutropia-IT Solution (Internship)

Frontend Developer

- Developed new features and customized features

Key Projects

PlateShare | React, React Router, JavaScript (ES6+), Firebase

- Built a full-stack food sharing platform that helps users connect with others, share meals, and reduce food waste.
- Implemented real-time collaboration features for users.

AppifyZone | React, React Router, Recharts, JavaScript (ES6+)

- App Discovery & Installation Platform
- Developed a fully responsive web application that simulates an interactive app store experience. Users can explore top apps, view detailed app information, install or uninstall apps, and manage their installations — all powered by dynamic state management and LocalStorage.
- Applied advanced React concepts for dynamic state management, routing, and real-time updates.

Customer Support Zone | React.js, JavaScript (ES6+), JSON (Mock API)

- Built a responsive React-based customer support dashboard to manage and track customer tickets using dynamically loaded JSON data
- Applied intermediate JavaScript concepts to handle dynamic content and user interactions and implemented dynamic ticket status updates and progress tracking, following a predefined Figma design for UI consistency.

Green-Earth | JavaScript (ES6+), RESTful APIs, DOM

- Built an interactive website promoting environmental awareness and sustainability.
- Applied intermediate JavaScript concepts to handle dynamic content and user interactions and utilized DOM manipulation to create responsive, engaging UI elements and real-time updates.
- Integrated API calls to fetch and display dynamic data.

Achievements & Participations

- 7th Women's Mathematics Olympiad 2023 at DU
- Intra Department CTF Contest 2022 at Cyber Security Club at UAP
- Dean's Award for Academic Excellence (Fall 2023)
